Subject Index*

A

Abnormal vascular reactions in atopic eczema, *21*

Acetylated endotoxin as mechanism for induction of Shwartzman's phenomenon, *56*

Acetylsalicylate, effect in guinea pig anaphylaxis, *14*

Acid-soluble phosphate esters, fractionation products in eczema and psoriasis, *52*

ACTH, animal and human origin, allergy to, *69*

effect on serotonin excretion in asthmatics and normals, *66*

Adrenal activity, suppression by aerosol steroid inhalation, *70*

function, effect of topical steroids on, *39*

Aerosol therapy in asthma, practical tips in, *51*

Air pollutants, aggravation of respiratory infections by, *46*

Airway collapsibility, role in obstructive emphysema, *88*

Algae, airborne, importance as allergens, *48*

Allergic granuloma of prostate, association with bronchial asthma, *67*

Allergy, development in infants, *24*

relationship to leukemia, *80*

Anaphylactic death, BSP dye as cause, *23*

reaction, dextran as cause, *5*

fatal, wasp sting as cause, *32*

intradermal test with tetanus antitoxin, as cause, *44*

Anaphylaxis, acetylsalicylate as inhibitor in guinea pigs, *14*

fatal, in man, *79*

passive, effect of BCG infection on sensitivity of mice to, *93*

Anemia, hypochromic, cow's milk sensitivity as cause, *84*

Angioneumography, studies with, during asthmatic attack, *82*

Antibiotics, topical use, *20*

Antibodies, anaphylactic, placental transmission in guinea pigs, *29*

Antibody formation and plasma cells in hamsters, *13*

in lymphocytes, in vitro, *11*

relationship to appearance of plasma cells in newborn hamsters, *13*

stimulation by immune RNA, *73*

inhibition by amino acid L-phenylalanine, *58*

lymphocytes, in vitro production of, *11*

occurrence on surface of bronchial mucosa, *58*

plaque, inhibition by sensitized lymphoid cells, *92*

production, effect of deficiencies in pyridoxine, riboflavin or pantothenic acid on, *78*

of 19S, by single cells, *76*

reaction, detection of by mitotic responses in blood lymphocytes, in vitro, *74*

response, diminution by deficiency of either pyridoxine, riboflavin or pantothenic acid, *12*

synthesis, cytoplasmic interaction between macrophage and lymphocytic cell in, *58*

effect of β-3-thienylalanine on, *89*

titers, effects of treatment with ragweed emulsions on, *2*

lack of correlation as determined by precipitin and hemagglutination technique, *74*

Antigen-antibody complexes, effect on cell membrane permeability, *92*

hepatic injury induced by, *87*

liver injury following injection of, *92*

Antigen, persistence in tissues during antibody formation, *30*

Antihistamines, systemic reactions from topical use as anesthetics, *71*

Antinuclear antibodies, occurrence in systemic lupus, *93*

factor, in light sensitivity and lupus erythematosus, *13*

*January—February, pp. *1-16;* March—April, pp. *17-32;* May—June, pp. *33-48;* July—August, pp. *49-64;* September—October, pp. *65-80;* November—December, pp. *81-110.*

Antipepsinogen antibodies, effect on gastric secretion, *41*
Arthus phenomenon, thiol compound susceptibility of protease in healing sites of, *26*
and Shwartzman reactions, role of leukocyte granules in, *42*
Aspirin, bronchial asthma induced by, *50*
Asthma, aerosol dexamethasone in treatment, *51*
angioneumographic studies during paroxysm, *82*
aspirin as cause, simulating congestive heart failure, *50*
differential diagnosis in infancy, *66*
effect of isoproterenol on, compared to normal subjects, *19*
of steroid therapy on serotonin excretion in, *66*
emotional field, study in two patients, *19*
and emphysema, serum enzymes in patients with, *82*
experimental, in guinea pig, induced by bronchial sputum, *18*
inhalation therapy, *34*
L.E. cell in, *18*
sedation as cause of death in, *51*
thermo fog in treatment, *34*
toluene diisocyanate as cause, *3*
urinary serotonin excretion in, *2*
use of stanozolol to promote growth of children with, *27*
Asthmatic sputum, interference with tryptic digestion by, *18*
Atopic dermatitis, delayed blanch reaction in, *21*
in females, effect of menstruation on, *68*
natural history of, *83*
results of 20-year-study of, *83*
statistical observations on, *21*
Autoantibodies, characteristics in pernicious anemia, *78*
occurrence in myasthenia gravis, *75*
Autoimmune disease, re'ationship to myasthenia gravis, *43*
mechanism, role in Stevens-Johnson syndrome, *37*
testicular lesions, induction, *43*
thyroid disease, immunologic studies in, *45*
Autoimmunity, as cause of infantile eczema, *20*
in ulcerative colitis, *77*
Autoimmunization, production by connective tissue extracts, *28*

B

β-3-thienylalanine, effect on antibody synthesis, *89*
Basophil degranulation test, indirect, in penicillin allergy, *69*
BCG infection, effect on sensitivity to histamine, serotonin, and anaphylaxis in mice, *93*
Bee sting, encephalopathy and papilledema caused by, *80*
venom, method for collection of large volumes of, *80*
Benadryl poisoning, treatment by exchange transfusion, *46*
Bithionol, contact photosensitivity from, *4*
sensitivity, following use of antiseptic creams, *21*
Blocking antibodies to ragweed, induction in dogs, *31*
Brain damage, penicillin shock as cause, *23*
Bronchi, occurrence of antibody on surface, *58*
Bronchopulmonary disease, chronic obstructive type, *70*

C

Canine antiserum, analogous to human allergic and blocking antiserums, *31*
Carbromal, nonthrombocytopenic purpura caused by, *66*
Chemical compounds, immunological unresponsiveness to, *60*
Chlorpromazine, progressive pigmentation of skin from, *69*
Chorionepithelioma, homologous skin grafting in patients with, *77*
Chronic discoid lupus erythematosus (CDLE), antinuclear factor in, *13*
ulcerative colitis, Shwartzman phenomenon and, *24*
Circulating basophils, analysis in immunologic reactions, *35*
Common antigens, presence, in human, canine, and rabbit hemoglobins, *92*
Connective tissue, anto-antigenicity, *28*
Contact dermatitis, epoxy resins as cause, *36*
formalin resins in clothing as cause, *52*
Saran wrap as cause, *68*
textile finishes as cause, *83*
thiram fungicide as cause, *53*
x-irradiation of lymphocytes as factor in, *35*
sensitivity, passive transfer by labeled lymphoid cells, *9*

Corneal limbal lymphoid foci, in vitro production of antibody by, *40*
Coronary artery disease, tobacco allergy as factor in, *85*
Corticosteroid eye drops, increase in intraocular pressure following use, *15*
Corticosteroids, intermittent dosage regimen studies, *7*
Cosmetic irritancy, new methods for evaluating, *19*
Cow's milk, sensitivity to, *84*
Cystic fibrosis, value of sweat test in diagnosis, *27*

D

Deer scurf, sensitivity to, *24*
Delayed hypersensitivity to ferritin in guinea pigs, electron microscopic study, *63*
transfer by lymphocytes in man, *73*
Dextran, anaphylactic reaction caused by, *5*
Diabetes, insulin antibodies as possible cause, *59*
Disseminated lupus, transplacental passage of antinuclear antibody in, *44*
DNA, presence of antibody to, in lupus erythematosus, *61*
Drugs, interactions, effects of drugs and chemicals on drug metabolism, *86*

E

Eczema, disseminated, studies, *22*
fractions of acid-soluble phosphate esters in lesions of, *52*
phosphorus content of skin lesions in, *57*
Eczematous lesions, statistical observations on, *21*
Egg albumin, circulating hemagglutinating antibodies to, in man, *10*
Electrophoresis, protein patterns in vernal conjunctivitis, *69*
Emotional field, study in two asthmatic patients, *19*
Emphysema, effect of steroids on, *88*
effects of slow deep breathing on blood gas exchange in, *9*
exercise training in, *46*
tracheal collapse in, *88*
tracheostomy in treatment, *26*
Emulsion therapy in ragweed hay fever, effect on antibody titers in ragweed hay fever, *2*
Encephalopathy, bee sting as cause, *80*
Endotoxin, acetylated as mechanism for induction of Shwartzman's phenomenon, *56*
Enzymes in sera of patients with asthma and emphysema, *82*
Eosinophilia, idiopathic, *47*
in magnesium deficiency and role of histamine in, *54*
Eosinophilic pleural effusion, *88*
Epoxy resins, contact dermatitis caused by, *36*
Exfoliative dermatitis, protein metabolism in, *57*

F

Farmer's lung, antigens in moldy hay as cause, *5*
pulmonary function in, *38*
Fish insulins, potential value in treatment of insulin resistance, *94*
reaction with human insulin antiserum, *94*
Food allergy, significance of precipitins in, *12*
use of EKG in guinea pigs to study pulse acceleration or deceleration in, *28*
Formalin textile dermatitis, clinical manifestations and diagnosis, *52*
Freund's adjuvant, pancreatic lesions in mice produced by, *71*
Furadantin, Löffler syndrome caused by, *53*

G

Gamma globulin, clinical uses, *15*
Gastric secretion, effect of antipepsinogen antibodies on, *41*
Gastroenteritis, eosinophilic, *94*
Globulin, β_{2A}, as molecular constituent of insoluble bronchial mucus gel, *47*
determinations in allergic children, *59*
Glucose-6-phosphate dehydrogenase, role in drug intolerance, *88*
Gluten antibodies, formation in relation to gastrointestinal disease, *77*
in nontropical sprue, *56*
Grass pollen extract, alteration in activity of, *82*

H

Hapten-protein conjugates, anamnestic response to, *89*

Hashimoto's disease, autoimmune reactions as cause of, *45*
occurrence in identical twins, *47*
Hay fever, treatment with Pool C fraction purified ragweed antigen, *3*
Hemagglutinins vs. skin reactions in penicillin sensitivity, *30*
Hemoglobin, specific antigenic properties of human, canine, and rabbit hemoglobin, *92*
Hemolysis, drugs and other substances as cause, *88*
Herpes simplex, vaccine therapy in treatment, *91*
Histamine, effect of BCG infection on sensitivity of mice to, *93*
skin content in urticaria, *36*
Histoplasmosis, effect of skin testing on antibody levels for, *11*
Homograft reaction, effect of urethane and x-irradiation on, *12*
rejection, role of circulating antibody in, *62*
sensitivity, induction by Group A streptococci, *91*
Homologous skin grafting, immunological studies, in patients with chorionepithelioma, *77*
Hydrochlorothiazide, thrombocytopenic purpura induced by, *59*
Hydrocortisone, effect on serotonin excretion in asthmatics and normals, *66*
Hypnosis, effect on P-K reactions, *64*
Hyposensitization therapy, efficacy in poison ivy, *67*

I

Immune response to hapten-polylysine conjugates in guinea pigs, genetic control, *76*
Immunologic mechanisms as cause of nonthrombocytopenic purpura, *86*
in patients with subacute bacterial endocarditis and penicillin allergy, *68*
reactions, detection by changes in circulating basophils, *35*
tolerance, effect of thymectomy on, in rabbits, *72*
unresponsiveness, relation of antigen dose in adult x-irradiated rabbits to, *10*
role of simple chemical compounds in, *60*
Immunoprecipitation, new device for, in agar gels, *72*
In vitro production of antibody by delayed phase corneal limbal lymphoid foci, *40*
Infantile eczema, autosensitivity as cause of, *20*
Influenza immunization in 1962, *12*
Inhalation therapy and asthma, *34*
Insect sensitization, Triatoma bite (kissing bug) as cause, *38*
Insulin antibodies, incidence, in pregnancy, cord blood, and infants serum, *60*
as possible cause of diabetes, *59*
resistance, adrenal steroid therapy in, *55*
use of fish insulins in, *94*
Intermittent corticosteroid dosage regimen, studies on, *7*
Intraocular pressure, corticosteroid eye drops as cause of elevation, *15*
Isoproterenol, comparison of effects in normal and asthmatic subject, *19*

K

"Kissing bug" bite, reaction to, *39*

L

Labeled lymphoid cells, passive transfer in contact sensitivity, *9*
Latex fixation tests, use in nonrheumatic states, *57*
L. E. cell, absence in bronchial asthma, *18*
Leukemia, incidence of allergic disorders associated with, *80*
Leukocyte granules, role in Shwartzman and Arthus reactions, *42*
Light sensitivity, antinuclear factor in, *13*
Liver damage, antigen-antibody complexes as cause of, *87*
Löffler syndrome, Furadantin as cause, *53*
Lungs, role of alveolar macrophage in clearing bacteria from, *55*
Lupus erythematosus, antibodies to DNA in sera of, *61*
Lymphocyte interaction, potential in vitro histocompatibility test for, *38*
Lymphocytes, human immune response and mitosis in vitro, *74*
immunologically competent, isolation from sensitized mouse spleens, *90*
Lysolecithin, effect on smooth muscle responsiveness, *54*

M

Magnesium deficiency, role of histamine in producing eosinophilia of, *54*
Mebrophenhydramine (Mebryl), effect in treatment of resistant urticaria, *52*
Meningococcemia, chronic, immunologic mechanism in pathogenesis of skin lesions associated with, *71*
Menthol sensitivity, diagnostic basophil response in, *84*
urticaria and flushing caused by, *84*
Mercaptoethanol inactivation of high and low molecular weight chicken antibodies by, *42*
Microsomes, hepatic, inhibition and excitation of metabolism by drugs, *86*
Milk allergy, allergenic properties of, *14*
clinical diagnosis, *22*
incidence in infants, *24*
oral challenge in diagnosis of allergy to, *22*
protein, antibody formation in relation to gastrointestinal disease, *77*
significance of skin test reactions in, *37*
ulcerative colitis caused by, *79*
Mineral oil, neoplasms produced by, *45*
Mold spore content of atmosphere, variation in Cardiff, Wales, *67*
Moldy hay antigens as cause of farmer's lung, *5*
Multiple antibody production, incidence in myasthenia gravis, *43*
Myasthenia gravis, antibody production in, *43*
autoantibodies in, *75*

N

Neoplasms, induction by mineral oil injections, *45*
Nitrofurantoin, pleuropulmonary reaction to, *85*
Nonthrombocytopenic purpura, carbromal as cause, *86*

O

Oxytetracycline and photosensitivity, *3*

P

Pancreatic lesions, production by Freund's adjuvant, *71*
Parathyroid hormone, immunochemistry, *90*
Patch testing with bithionol, severe reactions from, *21*
Penicillamine, nephrotic syndrome associated with, *54*
Penicillin sensitivity, brain damage following shock reaction from, *23*
immunologic studies in, *30*
indirect basophil degranulation test in, *69*
penicilloyl-polylysine as intradermal test for, *85*
skin test in, *39*
treatment in patients with subacute bacterial endocarditis, *68*
Penicilloyl-polylysine, diagnostic value of intradermal test with, *85*
penicillin hypersensitivity detected with, *39*
Pernicious anemia, autoantibodies to intrinsic factor in, *78*
P-K reaction, influence of hypnosis on, *64*
Phenothiazines, adverse reactions from, *85*
Phenylalanine, lessened antibody levels to diphtheria toxoid in animals from administration, *58*
Phenylbutazone hypersensitivity, sarcoid reaction associated with, *6*
Phosphorus, concentration in lesions of eczema, *57*
Photodermatitis, bithionol as cause, *4*
Photosensitivity, oxytetracycline as cause, *3*
tetracycline as cause, *4*
Placental transmission of antibodies in disseminated lupus, *44*
in guinea pigs, *29*
Plasma cells and antibody formation in hamsters, *13*
Plasmacytosis, peripheral, in serum sickness, *6*
Pleural effusion, eosinophilic, *88*
Poison ivy, value of hyposensitization therapy in, *67*
Pollen potency, loss due to adsorption to glass, *82*
ragweed, variation in individual exposures to, *34*
wettability influencing washout by raindrops, *51*
Precipitins, lack of correlation with clinical food allergy, *12*
Prostatic granuloma, allergic nature, *67*
Protein components of milk, challenge feedings with, *22*
metabolism in exfoliative dermatitis, *57*
Psoriasis, fractions of acid-soluble phosphate esters in lesions, *52*

Pulmonary disease, obstructive, mechanics of breathing in, *27*
Pulse rate, experimental use in guinea pigs for bioassay of food allergens, *28*
Pyribenzamine, systemic reaction following urethral instillation, *71*
Pyridoxine, effect on antibody responses in swine, *12*

R

Ragweed antigen, Pool C fraction in testing and treatment, *3*
pollinosis, repository therapy in, *66*
Repository therapy, mineral oil as potential producer of neoplasms in, *45*
in ragweed pollinosis (1963), *66*
reactions to, *50*
Respiratory infections, aggravation by air pollutants, *46*
tract, clearance of bacteria by, *25*
Ribonucleic acid, stimulation of antibody production by nonimmune spleen cells, *73*
Runt disease, immunologic incompetence in, *64*

S

Saran wrap, contact dermatitis caused by, *68*
Sarcoid reaction, phenylbutazone hypersensitivity as cause, *6*
Secondary response, immunological specificity with dinitrophenylated proteins, *89*
Sedation, effect on asthma, *51*
Serotonin, effect of BCG infection on sensitivity of mice to, *93*
urinary level in asthmatics, *2*
Serum protein change in response to positive tuberculin skin test in humans, *61*
sickness, peripheral plasmacytosis in, *6*
Shwartzman and Arthus reactions, role of leukocyte granules in, *42*
Shwartzman's phenomenon, acetylated endotoxin in production, *56*
comparison of lesions with chronic ulcerative colitis in humans, *24*
effects of trypan blue on formation of thrombi in, *8*
vasculitis caused by, *36*
Skin testing, effect on antibody levels for histoplasmosis, *11*
Splenic lymphocytes, isolation from sensitized mouse spleens, *90*
Sprue, nontropical, and gluten antibodies, *56*
Sputum, asthmatic, in production of experimental asthma in guinea pig, *18*
interference with tryptic digestion by, *18*
bronchial, β_{2A}, as molecular constituent of insoluble mucus gel in, *47*
Stanozolol, anabolic effects, *27*
Steroid aerosol, suppression of adrenal activity by inhalation, *70*
therapy during pregnancy, fetal effects, *28*
Steroids, in obstructive airway disease, *88*
thyrotoxicosis following long-term therapy with, *72*
topical, effect on adrenal function, *39*
Stevens-Johnson syndrome, hypersensitivity reaction common to SLE, *37*
Subacute bacterial endocarditis, cutaneous manifestations in, *83*
Sweat sodium and chloride, elevation in adults without cystic fibrosis, *27*
Systemic lupus erythematosus, antinuclear antibodies in, *93*

T

Terramycin and photosensitivity, *3*
Tetanus antitoxin, anaphylactoid reaction from skin test with, *44*
Textile finishes, contact sensitivity caused by, *83*
Thrombocytopenic purpura, mechanism of sensitization in, *59*
Thromboembolism, ulcerative colitis complicated by, *77*
Thymectomy, effect on immunologic tolerance in rabbits, *72*
Thyrotoxicosis, long-term steroid therapy as cause, *72*
Tobacco allergy, relationship to coronary artery disease, *85*
Toluene diisocyanate, asthma caused by, *3*
Tracheal collapse, wheezing caused by, in infancy, *66*
Tracheostomy and pulmonary emphysema, *26*
Tuberculin skin tests in humans, serum protein change in response to, *61*

U

Ulcerative colitis, milk as causative factor, *79*
Urticaria, histamine content of skin in, *36*
mebrophenhydramine (Mebryl) in treatment, *52*
menthol as cause, *84*

V

Vaccine therapy, treatment of recurrent herpes simplex with, *91*
Vascular reactions, abnormal in atopic eczema, *21*
Vasculitis, hypersensitive, of skin, *36*
Vernal conjunctivitis, serum protein electrophoresis in, *69*

W

Wasp sting, deaths from, *93*
fatal anaphylactic reaction to, *32*
immunologic studies in fatal case, *32*

X

X-ray induced leukopenia, effect on induction of contact dermatitis, *35*
